Homemade Magnets

You will need:

- Small magnets
- Craft glue
- 2-3 sheets of coloured craft paper
- Markers or pencil crayons

Instructions:

1. **Choose a shape:**

Draw your shape onto the craft paper and cut it out.

2. **Choose a positive message.** It can be for yourself, or for a friend or family member. Here are some examples to get you started!

3. **Draw your design onto your shape.** Feel free to decorate as much as you'd like.
4. **Put a small amount of glue onto a magnet.** Turn your drawing over and glue the magnet to the back. Give the glue 5-10 minutes to dry.
5. Find a fridge, whiteboard, or metal surface to **test your magnet.**
6. Leave your positive message in a public space for everyone to see! This could be on your fridge at home, on a whiteboard at school, or on a metal bench in a park.
