

## **NLLS Reading Program**

### **Family Take & Make Kits**

### **Melting Snowman Craft**

Here's what you need to make one (items in red are not in your kit):

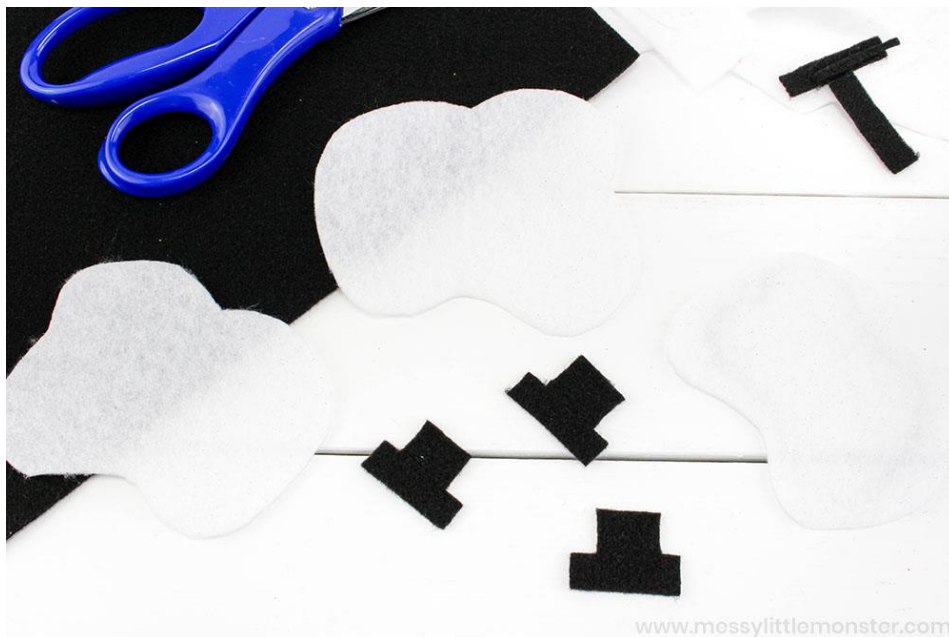

- Felt paper - black and white
- Pipe cleaner - orange
- Ribbon - red
- Googly eyes
- Pom poms - white
- Buttons
- Skinny tree branches
- Acrylic paint - black
- Paint brush
- Hot glue or white glue

## Instructions:

Glue 2 eyes on 2 pom poms. Then, cut the orange pipe cleaner down into a couple of small pieces to represent the carrot nose and glue it on. Lastly, paint 4-5 black dots in the shape of a smile and allow it to dry.

Cut out an odd shaped wiggly circle from the white felt to represent the melting snow approximately 3-4 inches wide as shown below.

Cut top hats out of the black felt. Then, glue the head and hat towards the top of the white felt that represents the melting snow.

Cut out 3-4 inches of ribbon, fold it in half, and then glue it at the top. Then, cut small arms off the tree branches and glue each to the melted snow as shown below.

Glue 3 buttons onto each snowman and you're finished.
