

Kool Aid Dyed Yarn

You'll need

1. White Yarn
2. 3 Packs of Kool Aid
3. 4 Yarn Pieces of a Different Colour
4. Scissors (Not Included)
5. Bowl, Pot and Spoon (Not Included)
6. Drying Rack (Not Included)
7. Water (Not Included)

Instructions

1. Gather supplies!
2. Create your skein. (Grab the end of your yarn from the ball. Hold the end in your hand and begin to wrap around your arm from elbow to hand. Try not to make it too tight. Unwrap the whole ball. Don't forget where the beginning piece is, when you are done, tie the two end pieces together.)
3. Take your few pieces that are a different colour and tie loosely around the skein.
4. Prepare a bowl of cool water, place yarn in the bowl and press down into the bowl until it is fully submerged. Leave for 30 minutes.
5. Fill a stovetop pot with about 4 liters of cool water. Add 2-4 packages of Kool Aid and stir in.
6. Take your yarn out of the water, squeeze out, try your best not to tangle it! Gently drop into dyed water.
7. Bring pot to stove, turn onto a low simmer and allow to absorb for about 30 minutes. Keep an eye on this and stir gently every 10 minutes or so.
8. You will know this is done when the water looks clear.
9. Cool water until you can handle the yarn, put yarn in a bowl with fresh warm water to ensure there is no bleeding from the yarn.
10. Squeeze out yarn again, then place on a drying rack. It will need to dry for a few hours!
11. Enjoy your new colourful yarn! Try using it to make a macreme feather with our other take and make kit!
